A: you should not download files via the repository from google. You can download the files from here: To launch Solidworks 2007 from the executable, you can create a shortcut to the EXE executable to desktop, and then you add it to the Start-up. Or you can add a shortcut to the Windows desktop "Computer" in a folder with SolidWorks 2007. A: Solidworks 2007 Release 3.0 builds 080112 and 081112 have the patch-updates you need for full TekLink support. Jealous of a woman? No. Not even a little. I like my men beefy (portly?)—like my lumbering, blocky, lumbering man. My old roommate, the one who I lived with for a year in college and whose mother I also used to call, used to get mad when her boyfriend's chest was getting too big. He didn't really care. She was sweet and devoted to him. She loved his torso as a complement to her own small, lean frame. I'd be tempted to say it's all about attachment style, but I don't think that's it. I'd love to think that, knowing in some quiet corner of my heart that no one else was actually attracted to my boy-ish, manly chest, but I don't. That's not the kind of jealousy I feel toward a woman with a chest like mine. Which is, frankly, not the first thing that comes to mind. Sometimes men, especially young men who are used to their bodies being perceived as "normal," find a big, chesty woman intimidating. And sure, a big-chested woman is a turn-off, but the trouble is with men who believe they're secretly attracted to the big, chesty woman. Those men are often better off simply being straight about what's on their minds. "Uh, hi, gorgeous, do I have a thing for you?" Q: How do I check to see if a string is a valid date? Currently I am having a problem where my Java program fails to recognize a date (string) entered from the user as a date. Here is my program: import f678ca9f9e
